Achievements

Developed and delivered a personal website development project that showcased my programming and problem-solving skills, contributing to the successful launch of the site.

Collaborated with team members to troubleshoot technical issues and helped find efficient and effective solutions.

Participated in a manual testing bootcamp, acquiring new skills and technical knowledge.

Contributed to increased sales through social media marketing campaigns, resulting in a 200% increase in website traffic. This translated to a 50% increase in appointment bookings and sales for the business in the first quarter.

Demonstrated problem-solving skills by identifying and reporting defects in early stages to prevent major incidents on the site.
